SMART SOLUTIONS FOR THE LABELING INDUSTRY

MATRIX REMOVER & SLITTER

model **MCH25F5151S**

Specifics

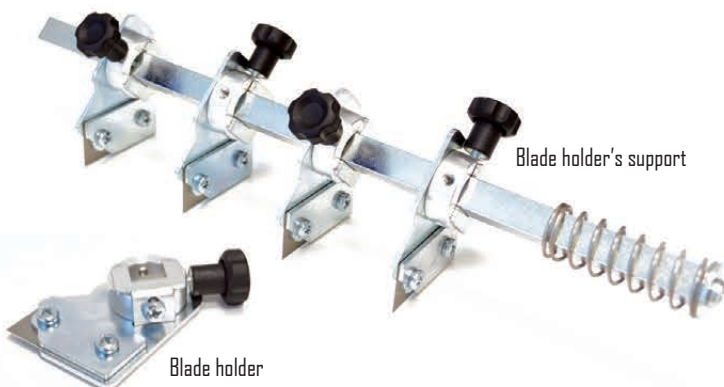

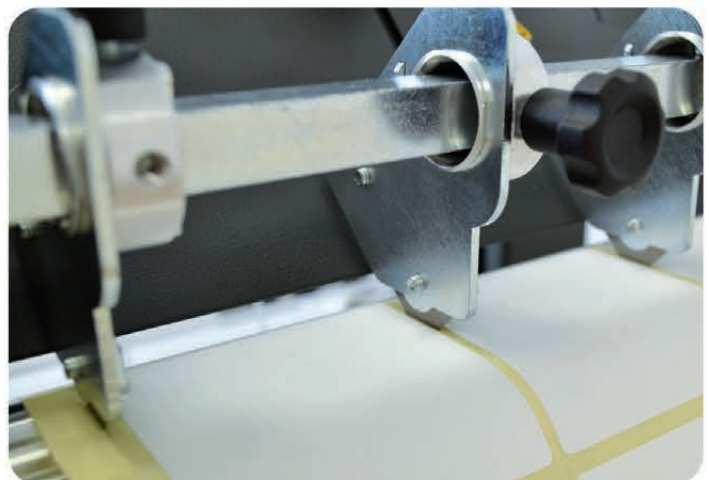

- 100-240 Vac Power Supply, 50-60 Hz, out-put of 24V 
- Dimensions:
 - Height: 650mm
 - Width: 900mm
 - Depth: 500mm
- 4 Blades Included
- 3" Fixed Core Holders
- Maximum Outside Roll Diameter 250mm
- Maximum Label Width 220mm
- Minimum Slitting Width 25mm
- Manual speed Adjustment
- Label Rewinding Face-Out only

This machine can unwind, remove the label matrix from a die cut label roll, slit thanks to one or more cutter blades, and rewind onto a 3" motorized core holder rewriter.

The label matrix is the excess label material around each die cut shape, where ink or toner may settle after a full bleed printing process.

The machine can also be used to only remove the label matrix or only as a slitting system.

The matrix removal and slitting operations are performed simultaneously. It is a specific machine designed to handle die cut label rolls and ideal for all slitting needs.
